

# BACKUP CLOUD SERVICE POWERED BY ACRONIS®

- **Implement** new managed IT Data Protection strategy now
- **Protect** every piece of your IT infrastructure – physical and virtual, Windows, Mac and Linux, servers and desktop and laptop PCs
- **Focus** IT on production tasks – while we take care of data protection
- **Get** hybrid protection and eliminate the risks of losing data
- **Select** the size of backup storage you need today and easily get additional space as your infrastructure grows
- **Eradicate** the costs associated with tapes and cumbersome tape rotation
- **Reduce** risks with proven quick bare-metal recovery from Acronis

**BackupService** powered by Acronis, provides safe, secure and scalable data protection, bare-metal recovery, and on-site and cloud backup of any data, anywhere, anytime. It is a *fully managed* service – we will take care of your data protection and you focus on your primary business tasks!

Powered by the Acronis AnyData Engine, *BackupService* backs up disks, partitions, and files to our storage in a secure data center and allows you to quickly recover selected files, folders, applications, or an entire system.

With unified *BackupService*, you get the dual protection you need in the event of a disaster. The Acronis AnyData Engine backs up to local storage on your premises for quick restore and to secure Acronis Cloud for recovery in the event of a disaster.

## Why do you need Backup Service powered by Acronis?

- To protect your data in the event of user errors, hardware failure, security breaches and viruses, loss or theft of devices, software errors, data leakage, and problems with software and hardware updates and upgrades.
- To quickly and easily implement a hybrid protection strategy
- To replace tape and other legacy backup solutions

## Why businesses choose service powered by Acronis?

- Backup admins trust Acronis' proven bare-metal recovery
- IT Managers value multi-platform data protection
- CIOs trust Acronis brand proven track record and expertise

## Key Features

- **Physical and virtual systems** – protection of both physical and virtual systems in one service
- **File and disk image-based backup** - backup of selected files or complete disk images
- **Bare-metal recovery** – recovery to same or dissimilar hardware, even from the cloud
- **Local and cloud storage** – support of local and safe cloud storage in *our secure data center*
- **Initial seeding** to easily move large volumes of data to the cloud:
  1. Backup to an external HDD
  2. Courier it to *Service Provider* or direct to the Acronis data center
- **Multi-level security** – AES-256 encryption, password protection and SSL
- Acronis' **secure software-defined storage data center** are equipped with all latest disaster prevention technologies, and are SSAE 16 certified

## Supported Platforms

Microsoft Windows	Linux	Virtual Hypervisors
<ul style="list-style-type: none"> <li>- Server 2012 / 2012 R2</li> <li>- Server 2008 / 2008 R2</li> <li>- Server 2003 / 2003 R2</li> <li>- SBS 2003 / 2003R2 / 2008 / 2011</li> <li>- MultiPoint Server 2010/2011/2012</li> <li>- Storage Server 2003/2008/2008 R2/2012/2012 R2</li> <li>- 2000 SP4 Professional, Server and Advanced Server</li> <li>- 8.1 / 8 / 7 / Vista / XP SP2+</li> </ul>	<ul style="list-style-type: none"> <li>- Red Hat EL 5.x, 6.x, and 7.1</li> <li>- Ubuntu 12.04 ~ 14.10</li> <li>- Fedora 18 ~ 21</li> <li>- SUSE SLES 10 and 11</li> <li>- Debian 6 ~ 7.7</li> <li>- CentOS 5.x ,6.x, and 7.x</li> <li>- Oracle Linux 5.x and 6.x</li> <li>- Any other x86/x64 Linux with kernel from 2.4.20 to 3.16 and glibc 2.3.2 or later</li> </ul>	<ul style="list-style-type: none"> <li>- VMware vSphere (ESXi) 3.5r2, 4.0, 4.1, 5.0, 5.1 and 5.5</li> <li>- Microsoft Windows Server 2008 / 2008R2 / 2012 / 2012R2 with Hyper-V</li> <li>- Microsoft Hyper-V Server 2008 / 2008R2 / 2012 / 2012R2</li> <li>- Citrix XenServer</li> <li>- Red Hat Enterprise Virtualization 2.2, 3.0</li> <li>- Linux KVM</li> <li>- Oracle VM Server for x86</li> </ul>
